

Back London

Find London's empty houses. Fill them. Don't get caught.

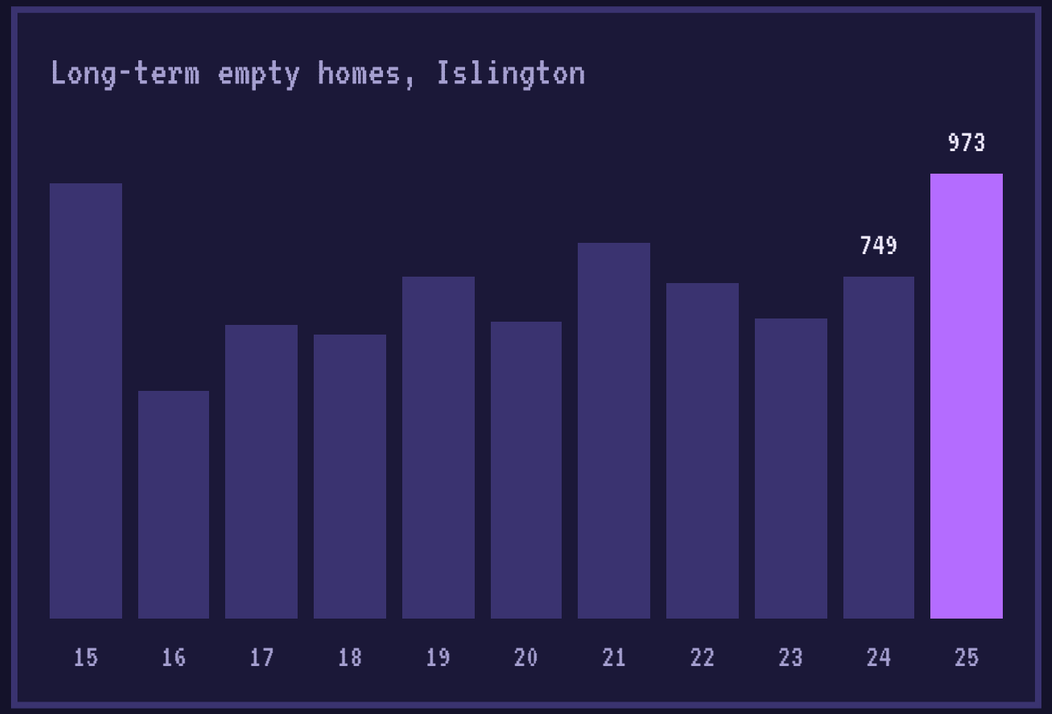

The problem

973

homes in Islington have stood empty for over 6 months.

Up from 749 a year earlier (+30%). 303,185 across England.

Councils can step in, with an Empty Dwelling Management Order. But first someone has to find them and report them.

Source: MHCLG Live Table 615, long-term vacant dwellings (empty 6+ months), October counts.

The solution

Turn finding empty homes into a game.

1

Run the real streets of your borough and find the empty homes.

2

Stand next to one to report it. Purple turns green.

3

973

Clear the borough and see its real empty-homes numbers.

What it is

A pixel arcade game on a real map of London.

- Plays in the browser. Nothing to install.
- Pick a borough. Islington first.
- Every street is a real street. Every empty home sits on a real building.
- 3 lives. Get caught and you lose one.

Who's chasing you

The Politician

The Landlord

The NIMBY

How it works

Real data, all the way down.

Map

tiny.london: Greater London as one pixel-art picture.

Streets

OpenStreetMap roads, lined up to the picture with the map's own projection. You can only walk on real roads.

Empty homes

Each one sits on a real residential building. Next: government counts by postcode decide how many, and where.

Report

Stand by a home for 1 second. It turns green. Fill them all to clear the borough.

Islington: 21,000 road segments, 10,000 homes, 239 postcodes.
